## Cameras, Bags, And PhotoFrames

### Digital Foci's Picture Porter 35

The Picture Porter 35 is a compact device that allows you to store, view, share, and manage your digital image files on the go. Simply insert the memory card from your camera into the device and download the images directly onto its built-in high-capacity hard drive. The Picture Porter 35 is compatible with all of today's most popular memory cards and features a 3.5" LCD screen, allowing you to view the images in various formats or even as a slide show. It also supports music and video files and can be connected to a TV to share your images or video clips with family and friends. The suggested retail price is \$399 for the 250GB version and \$499 for the 500GB version.
