Mat selection:

Black/Cream/Gray

**The most upscale and feature-rich digital frame available,
designed for those that demand the highest quality.**

❖ Versatile playback options

- Photo slideshow with random option, adjustable time intervals, and multiple transition effects
- Zoom, pan, rotate photos, view EXIF information, and view photo thumbnails
- Automatic on/off timer for scheduled operation with 3 separate settings available

❖ Capable of selective playback

- Customize your slideshow by selecting a subset of photos to view, without needing to delete any photos

❖ Supports user-created playlist

- Create, edit, and sequence varied and unique playlists directly on the device, without taking up any extra memory space

❖ Flexibility to play from multiple sources simultaneously

- Choose to play from a single or multiple memory sources (Internal Memory and all inserted cards) at the same time
- Break from the limitation of viewing photos from only one memory source at a time

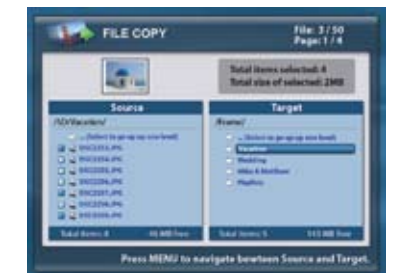

❖ Folder structure navigation enhances photo management

- Organize photos, music, and videos into separate folders and playback a specific folder as a collection
- Add music files to further customize the slideshow
- Import *Web Albums* to play as a slideshow

❖ File management features eliminate need for computer

- Copy photos directly between memory cards and internal memory
- Organize files with advanced file management features: copy, rename, delete files, and create new folder

❖ Advanced multimedia format support

- Image: JPG, BMP, TIFF, GIF, RAW from select DSLRs
- Audio: MP3, AAC, WMA, OGG, WAV
- Video: MJPEG, MPEG-4 SP
- Select playback by photo only, video only, both photo and video, or photo with music

Our Name

Digital Foci is the set of points where you enjoy and manage all of your digital content. Digital represents all of the different forms of digital media and data you use everyday. Foci (pronounced "foe-sigh") is the plural form of the word 'focus' and symbolizes the many distinct points where light and sound converge and diverge. It is at these digital focus points, these foci, where you view and share your digital photos, watch your digital video, listen to your digital music, and access your digital files.

At Digital Foci, we aim to provide products and information for you to create your own personal set of *digital foci*.

Our Goal

The rapid increase of user created digital content in the form of digital photos, videos, MP3 files, and computer data, spurred a need for solutions to help average consumers manage and enjoy their digital collection.

Digital Foci provides solutions to help you ***manage and enjoy your digital content***. We accomplish this by providing devices for easy data transfer, storage, and management optimized for any setting.

This is our goal at Digital Foci:

To make your life more enjoyable by simplifying complex digital technology.
